

RES500 Rodent Non-Rebreathing Circuit

This acrylic manifold allows the position of the inside gas supply tube to be adjusted for any size rat or mouse, reducing dead-space and preventing CO2 build up.

The nose diaphragm can be customized to fit any shape.

25 replaceable diaphragms are included.

Re-order replacement diaphragms P/N RES501: price per package of 25 is \$7.25.

The complete system is MRI compatible.

The evacuation end accepts both 19 mm and 22 mm hosing.

The optional RES505 Waste Gas Interface connects the RES500 and balances the negative pressure of active evacuation or vacuum outlets.
